### Description

A Romanian company produces polypropylene bags, polyethylene bags, Big Bags, polypropylene fabric for Big Bags, polypropylene fabric for bags. Big-Bags sacks are made from polypropylene fabric, in a variety of different sizes, filling, unloading and lifting. With a capacity from 500 kg to 2000 kg, the big-bags polypropylene sacks are an ideal way of packing.

With 4 production lines and a production staff that have over 20 years of experience in the field, the company produces in a 20.000 square meter warehouse and can reached a production capacity over 1000 tons of processed polypropylene per month.

Lately company decided to apply an assortment diversification strategy to extend the range of products and to differentiate their products from those same or similar belonging to other competitors.

In this situation they pursue finding manufacturers of the following chemicals:

1. Blue masterbatches in pellet form with the follow properties:
  - Cadmium free, lead free, others heavy metals free
  - produced using raw materials which comply to EU food packaging regulations
2. Filler masterbatches in pellet form concentrates of Calcium Carbonate -CaCO<sub>3</sub>- or Talc in a polymer base that perfect dispersion and optimized flow properties, ensuring easy processing, with the follow properties:

- Cadmium free, lead free, others heavy metals free
- produced using raw materials which comply to the following food packaging regulations: Regulation (EC) No 1935/2004 on materials and articles intended to come into contact with food; Regulation 10/2011 relating to plastic materials and articles intended to come into contact with foodstuffs including Regulation 321/2011 and 1282/2011; Resolution AP (89) I on the use of colorants in plastic materials coming into contact with food

3. UV-stabilizer masterbatches with selected heat and light stabilizers, for virtually every polyolefin application that easy processing without affecting the mechanical properties of the end products and comply to EU food packaging regulations

## Advantages and Innovations

The company has implemented the Quality Management System ISO 9001/2001 and ISO 22000/2005 which constantly supported them in securing good traceability and assuring at any moment the guaranteed quality of the products.

## Technical Specification or Expertise Sought

Companies with production technical experience and longstanding abilities in transnational activities are sought.
