### Details

#### Description

The company located in northeast part of Poland has been on the market since 2000. It is a leading Polish producer of polypropylene (PP) and polyethylene (PE) regranulates made only from post industrial waste. Monthly the firm processes up to 1000 tonnes of waste. The company offers PP, PE black regranulates, PP, PE mix color regranulates, PP grey regranulates and PP natural regranulates. The firm also produces the lawn grille – it is used to harden and stabilize the ground, while ensuring natural water circulation in the ground. The firm puts strong emphasis on environmental aspects . The grille is made of plastic obtained by recycling of plastic waste. This is an ecological replacement option for cobblestones, asphalt or cellular panels. It can be used in car parks, lawns, open storage facilities, access roads in housing estates, golf courses, animal catwalks, etc.

The company cooperates with business partners in Poland, France and Germany. It is also very active in the field of obtaining subsidies from EU funds and takes part in many trade fair events to promote its products and services.

Certificates and quality standards: ISO 9001:2015, ISO 14001:2015.

The company is willing to establish cooperation with manufacturers that generate waste (waste code 15.01.02 - plastic packaging). The company would like to purchase pre-production PP and PE waste. It is also interested in buying post-production PP and PE waste, but such waste will be meticulously checked before acceptance of the shipment.

The company wishes to establish contacts with new suppliers. It is looking for cooperation under

the manufacturing agreement. The company would like to cooperate with firms from food industry, packaging industry, foil producers, textile producers, packaging companies, flexographic printers, etc. that obtain plastic packaging waste during the production process. The firm would like to cooperate with business partners from European countries.

## Advantages and Innovations

- strong emphasis on environmental aspects,
- ecological products,
- high quality of services,
- transparency of operations,
- experienced and helpful staff.

## Technical Specification or Expertise Sought

The company is looking for providers of waste - code 15.01.02 (plastic packaging) according to the European List of Waste. Transportation by the waste supplier is preferred. It is possible to reimburse transport costs, but only in the case of long-term, cyclical cooperation. Preferred quantity - full truck transport - 20 tonnes. If the supplier delivers the waste himself at his own expense, it is possible to accept a smaller amount of waste - at least 500 kg. There is no upper limit to the quantity of PP/PE waste delivered.
