Details

Description

The inventor has developed a portable and reusable toilet seat cover that can be used to cover the toilet seat in public toilets in order to avoid direct contact and maintain personal hygiene. It is especially useful for parents with small children when they need to use a public toilet or for elderly people. After use it can be easily cleaned, for example with an antibacterial wet tissue. The toilet seat cover is made of soft silicone that will take the shape of the toilet seat and maintains good contact without slipping. The toilet seat cover is 1 to 2 mm thick and can be manufactured in various colors or with drawings for children. It can be easily folded and stored in a small pouch. The inventor will offer the product for a partner company to manufacture and sell under license within a licensing agreement or a manufacturing agreement.

Advantages and Innovations

The main competitive advantages of the product are:

- It is made from soft silicone ensuring comfort;
- It is portable and requires small space when stored in the pouch;
- It is reusable and easy to clean in order to maintain hygiene.

Partner Sought

Type and Role of Partner Sought

The targeted partner is any EU company specialized in hygiene products. The partnership is envisaged as a licensing

agreement or a manufacturing agreement depending on the particular circumstances:

- For a licensing agreement, the inventor will transfer the license to the partner who will then manufacture and sell the toilet seat cover.
- For a manufacturing agreement, the inventor will keep the license and will cooperate with the partner who will manufacture and sell the product.
