## Details

---

### Description

A Polish company, established in 1992, offers biological support for wastewater treatment plants both industrial and municipal. On the basis of this experience, the company for several years is developing the retail sale of branded biological preparations for septic tanks, sewage systems, composting, pond cleaning and other applications. A Polish company would like to expand preparations for water and is looking for suppliers of these type of products. The company is looking for the products which offer an effective technology of wastewater treatment and air odor nuisance treatment (using formulations containing bacterial strains). The company is looking for the eco-friendly products which can remove accumulated odors. Now the company is interested in cleaning biological gel (multipurpose type and for toilet cleaning). The company is interested in establishing direct cooperation with manufacturers and import their raw materials/goods direct to Poland.

### Advantages and Innovations

Market advantages and innovations:

- good experienced in the polish market - 25 years,
- leader in the Polish market in the field of anti- odor techniques and methods,
- established business contracts,
- products laboratory tested,
- up-to-date marketing and advertising strategy analytic in the specific field.

### Technical Specification or Expertise Sought

The company constantly is expanding the range of products. A Polish company cooperates with Litwa and the Czech Republic, and also has a lot of business contracts with other companies from Poland. A Polish company implemented professional technology for individual use. The company is looking for the products which can be safe for flora and fauna.
