Details

Description

A French SME, based in Northern France, is manufacturing implantable medical devices. It is specialized in innovative solutions for visceral, bariatric, urological, gynecological, orthopedic, spinal and plastic surgeries. Created in 1995, it has developed competencies and expertise in textiles, plastics and mechanics, which has enabled them to work with many biocompatible materials. For a new product development of a medical device for hernia, the company is looking for a biocompatible poly-L-lactide acid (PLLA) film with medical grade certification (ISO 10993) and the specifications mentioned below.

The company is ideally seeking a subcontractor, but is also open to other partnerships such as producing under a license agreement, manufacturing agreement, and service agreement or eventually by a reciprocal production agreement.

Technical Specification or Expertise Sought

The company is looking for a biocompatible poly-L-lactide acid (PLLA) film with the following specifications:

- medical grade certification (ISO 10993)
- manufactured by roll ideally from 300 to 380mm width
- thickness between 50 to 70µm
- non-sterile

Stage of Development

Already on the market

Comments Regarding Stage of Development

Medical grade certification (ISO 10993) is mandatory.

Partner Sought

Type and Role of Partner Sought

The company is ideally seeking manufacturers of PLLA film, which are used to produce medical grade films. They can act as subcontractors following the specifications provided by the French company. The partner can also work under a license agreement, a manufacturing agreement, reciprocal production agreement or services agreement. The best partnership suitable for both parties can be determined throughout further exchanges.
