Details

Description

People that rides or work with horses know that in order to for the horse to get a better grip on a slippery surface, either in the summer or winter, there is a need to screw in studs on the horse shoe.

It is also necessary use a tap to clean the stud holes. Studding a horse is often a long process that involves many tools such as tap, wrench, spanner, screwdriver, cleaning pin and studs.

The Swedish company with years of experience in professional horse riding has invented a smart and handy stud tool to facilitate studding of horses. The Stud plate is the only tool you need to get the stud job done. An all-in-one tool for studding includes spanners for the most common stud sizes, a pin to get the dirt out of the stud holes and a tap to fix worn and dirty threads. It can also store eight studs on the plate. It is very convenient and simple. The Stud plate is a high quality stainless steel tool with ergonomic design.

The Swedish company is interested in finding a reliable and experience manufacturer of stainless steel that can produce their product to cost-effective and competitive price and quality. The manufacturing partner should be located in Europe.

Advantages and Innovations

- The Stud plate is smart and handy stud tool with ergonomic design.
- An all-in-one tool for studding includes spanners for the most common stud sizes No need to carry many tools (tap, wrench, spanner, screwdriver, studs)
